

2500 SERIES ELECTRIC BASEBOARD HEATERS

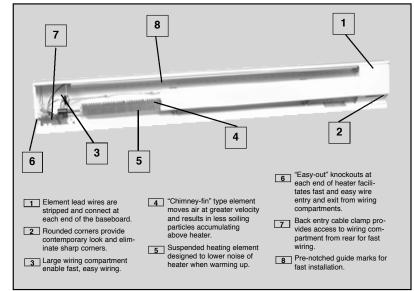

For use in residential construction such as single family homes, apartments, modular or mobile homes, as well as commercial, industrial and institutional construction as primary, secondary or supplemental heat for new construction or remodel applications.

- Easily installed without disassembly using mounting holes in rear of cabinet.
- Dual and triple ratings allow many models to cover most variations of wattage and voltage.
- Designed for quiet operation... no popping and pinging normally associated with baseboard heaters.
- Lead wires and grounding pigtail allow quick field connection to either end of heater.
- Continuous capillary tube safety thermal cutout protection in case of airflow blockage.
- Five knockouts at each end for convenient wiring.
- Built-in cable clamp in each junction box for field wiring without additional hardware.
- Many different accessories available.
- Chimney fin element design for maximum air circulation. Airflow is directed away from wall to help prevent wall soiling.
- UL listed for installation on wall at floor level with wall-to-wall carpeting. Heater stands unsupported during installation.
- Navajo White enamel finish retains attractive appearance and is compatible with all interior decors.
- Exclusive heating element design combines the durability of a steel tubular heater with the excellent heat transfer characteristics of aluminum fins.
