

## CVCHS

### Booster Heater-Corrosion Solution Applications

- Non-metallic (CPVC) Pipe Body
- 1.5 - 3 kW
- 120 and 240V, Single Phase
- General Purpose Terminal Enclosure
- INCOLOY® Sheath Elements (75 W/In<sup>2</sup>)
- Integral Thermostat (60 - 190°F)
- Integral Automatic Cutout (Set at 195°F)

### Dimensions (Inches)

### Applications

Used to heat clean and corrosive solutions. Ideal for side-arm heating, in-line circulation and engine pre-heaters.

### Features

**Terminal Enclosure** — E1 General Purpose is standard.

**Elements** — INCOLOY® sheath elements rated 75 W/In<sup>2</sup>.

**Flange** — Stainless steel flange for corrosion resistance.

**Vessel** — CPVC pipe body material is resistant to many corrosive solutions and is

ideal for water applications. Pipe body material provides good thermal insulation, reducing heat loss.

**Thermostat** — Integral thermostat with 60 to 190°F temperature range, located inside the terminal enclosure.

**High Limit Control** — Integral automatic cutout (overtemperature control) protects against fluid or element overheating (set to open at 195°F).

**Vibration Resistant** — Vibration resistant construction to withstand vibrations typically experienced on many types of operating equipment (i.e., engines).

**Easy to Install** — Minimal size and light weight, no supporting brackets are required.
